Asbestos is a naturally occurring mineral that was commonly used in building materials due to its insulating and fireproofing properties. Exposure to asbestos fibers may increase the risk of asbestosis, lung cancer, mesothelioma, and other cancers.

Asbestos can be a concern regardless of the age or size of a building. It is important that sampling be done prior to destructive construction, renovation, or demolition activity so that care can be taken not to spread asbestos fibers.

Karl Environmental Group is ready to help with every aspect of a project concerning asbestos. Our professional team is trained in the applicable asbestos-related laws and regulations, ensuring our clients receive the best possible service.

Karl Environmental Group asbestos services include:

- **Asbestos Project Design**
- **Asbestos Surveys**
- **Asbestos Surveillances and 3-year Re-inspections**
- **Project Compliance Monitoring**
- **AHERA Inspections**
- **Asbestos O&M Repair**
- **Asbestos Abatement**
- **Asbestos Awareness Training**
- **Asbestos Management Plans**
- **Clearance Monitoring**
